

Manufacturing Vertical

Manage Orders Start to Finish

Whether you're managing large-scale production runs or smaller ad hoc Just-in-time manufacturing orders, a Quick Base application from MCFTech can give you that one place to manage everything saving you time, money, and frustration. From initial order generation, to managing Schedules, Materials, Equipment and Resources, a Quick Base application from MCFTech can help every step of the way. Keep all your essential data and documents in one place, and always know you are looking at the latest information.

Safety & Regulatory Compliance

Ensuring your organization stays compliant with ever-increasing regulations is vital to the health of your business. These regulations come from a variety of agencies including EPA, DOT, FDA, OSHA, and the NLRB to name a few. With a Quick Base application from MCFTech, you can easily track new regulations, manage and document steps you've taken to become compliant, and centrally store the necessary data and documents that make an audit a snap. Safety is important and with Quick Base you can manage real improvement.

Manage People and Assets

Efficiently managing your people, equipment, materials and tooling helps make sure that you bring together all the right resources to get the job done at the right time. Best of all with Quick Base you can synchronize these processes with your ordering, scheduling and warehouse operations to achieve the ultimate in efficiency and coordination. Track your utilization and coordinate needed training and maintenance. Have the current status of critical resources at your fingertips so you can quickly respond to "real world" curve balls.

Finally, there is a solution to the age-old problem of too many data silos resulting from too many different systems; Quick Base. Quick Base is a Software Platform, which means it is a great set of off-the-shelf, battle tested "No Code" tools that let business users or IT users to rapidly create their own custom apps to replace and connect all those traditional data silos. Quick Base lets you work the way YOU want to work, not asking you to conform to "some software's" idea of how to run your business. All this adds up to seamless hand-offs, zero redundancy, automatic reporting, automatic workflows, and helps you achieve a truly LEAN organization.

Barcodes and RFID

- Label items to automated data entry
- Track the movement of materials and equipment
- Output your own labels from Quick Base

Resource Scheduler

- Schedule people, machinery, and other resources
- Assign tasks, duration, task type with ease
- View work requests and assign resources

Word Fusion

- Auto Generate formatted documents and Labels in MS Word or PDF format
- Combine with DocuSign for full paperless workflow

MCF|TECH

Your Toolbox is Never Full; Let MCFTech Provide the Best Tool You'll Ever Use

It takes a lot of people, materials, tools, and equipment to complete a successful manufacturing order. Shouldn't your most important tool be the one to help manage it all? With Quick Base applications from MCFTech, ensure all your processes are as lean and effective as possible. Manage your entire order lifecycle from receiving and warehousing of raw materials through scheduling, production, and shipping. Let MCFTech help you optimize your productivity and profitability. Best of all, with real-time Business Intelligence, keep a close eye on your KPI's, to ensure your orders stay on time and on budget.

Material Handling

From Receiving, to Warehousing, to executing the movement of raw materials, finished goods and everything in between today's manufacturing demands real-time speed and accuracy. MCFTech has perfected the use of barcodes and RFID technology within Quick Base Applications that can help get the job done right!

Keep your Equipment in tip top shape

Equipment reliability and functionality can make or break a production run. With Quick Base, we can help you not only track where your equipment is and where it needs to be, but also incorporate maintenance and MRO to ensure its working correctly when it is used.

Document Management

Spend time managing your production, not your documents. Use the native Quick Base document management, or integrate with leading solutions like Amazon S3, Microsoft SharePoint, Dropbox, Box, Google Drive, to keep all your critical documents at your fingertips.

Track Your Tooling; Track Your Savings

Misplaced tools and equipment cost millions of dollars every year in lost productivity. Incorporate barcode scanning on your tools. Standardized prep tasks, and cross contamination visibility with a Quick Base application make sure your tools are ready to work when you need them.

Major Food Manufacturer uses Quick Base to integrate their entire Operation

When manufacturing consumer goods intended for human consumption (think food) or application (think makeup), it is imperative to maintain a perfect Chain of Custody for any material item used within the final product. Even with material lots that have to be split and moved around the operation, positive control and real-time location is a must. Combine that with Equipment and Tooling needs that must take into account allergens, specialize cleaning, etc. and you have the perfect use for Quick Base and MCFTech. We managed all that within a large food manufacturing operation and nailed it.
